amazing feeling of locomotion and great fun to play

needs to be much longer and expanded on but a great story very excited to see where this game could go. Full disclosure - I had the honour of getting to play this at GDC in 2016, am a big fan of this developer, and was eagerly awaiting the release. I've always been impressed by this game.

To me, this is a gem and an example of a really well made game. It is easy to play, and difficult to master. The soundtrack is perfect. The art is cute and unique (and you'll always recognize a semispheres level when you see one). I'm a bit old, so it really does do a bit of a workout on my brain. If I was to pick one mechanic I love, it is the guards.

Now, I'm an indie by trade and a strong believer of the indie scene. What does that mean? Well, realistically, if you buy this game, your cash is going to a small indie developer that did something super cool so he can spend time to make something even better. This is really a strong game from an indie developer, and I'd buy this over an E.A. title any day.. This is one of the best strategy games since I learned how to play chess.. This game is strangely addictive and fun. Ok proper review now since i got the game working (the mouse and keyboard didn't work since i had a blue tooth usb game controller plugged in). So what do I think of this game, its brilliant. It has a atmosphere and plenty of freaky things happen. You have to run round a seemingly deserted island looking for your lost family members. The best thing about this game is the classic horror feel to it. 7/10 Some work still needed but for early access, this is a great horror game that doesn't make your wallet cry.. This game is hella fun! BUY IT. Love this game.

the painting feels very realistic and is very good to practice sketches before you paint it in real life if that is your intention. I do on the other hand wish that it had some sort of stencil that we could use but that is only one small thing. A cool thing that could be added is more locations for some different painting experiences but the game does have a nice selection of places to paint already but maybe make it to were people could make and upload custom locations? over all a fantastic simulator. 10/10 (btw i suck at spelling so just know that i know) Add me if you want to paint!. This is amazingly good but very dark, this is not some cute story, and if you do like japanese idols you might not like this because it paint the industry in a very bad but honest light. love it so far for that dark realistic edge though. So far the main character is struggling with his morality as he know contributing to such an exploitative industry is wong, yet he doesn't know how to get out.

Really really boring.. Great Bat and Ball Pinball Retor 2D Pixel Indie Art.

. Stinking pile of poop, its not like the jones game and yes the dev may have been inspired by jones the same way a book inspires someone to write a book so well done! don't buy..... Glitched controls, buggy gameplay. Can't recommend.. Simple game, simple controls (just movement), cool music, fun concept, cheap. Also, you can get all of the achievements if you're good at this type of game and/or willing to put in the time to learn the patterns of each unique screen (may require a bit of patience).. If you have always struggled to connect with a nihilist you know this game may be the perfect budget option to provide some insight.
